

The Federal Highway Administration's Office of Operations (FHWA-HOP) and the European Commission's (EC) Directorate-General for Mobility and Transport invite you to attend the next webinar in their urban freight series:

United States and European Examples: GAINING INSIGHTS FROM FREIGHT DATA

Tuesday, March 27, 2018
11:00AM to 12:30PM EDT, UTC -4

U.S. Department of Transportation
Federal Highway Administration

European
Commission

United States

Maricopa Association of Governments
Smart Moves Freight Program

Tim Strow

Senior Transportation Project Manager
Maricopa Association of Governments

European Commission

Engineering and Physical Sciences Research Council's
Freight Traffic Control 2050

Tom Cherrett

Professor of Logistics and Transport Management
University of Southampton

This webinar will focus on U.S. and European organizations' efforts to gain deeper insights from freight data, with a particular focus on how freight data has supported the development of freight plans, stakeholder engagement, and infrastructure investments.

The intended audience is both U.S. and international freight planners and practitioners at all levels of government; we will also present information relevant to private-sector freight logistics coordinators.

TO ATTEND THE WEBINAR, PLEASE [CLICK HERE](#) TO REGISTER BY MONDAY, MARCH 26, 2018
