LPC is the South Island's largest international trade gateway, taking Canterbury and the South Island's goods to the world. We are a critical link for Canterbury and the South Island, supplying our region with the goods we need every day.

That's why we take our role in the economic sustainability of Christchurch, Canterbury and the wider South Island so seriously. We are committed to making sure we develop a profitable Port to ensure that it is able to handle the projected growth in volumes and that we are sustainable in the long-term, while delivering value to both our shareholder and the people of our region.
